Letter to shareholders

Dear Business Partners, Customers,
Shareholders, and the Nova KBM
Group employees

In the first quarter of 2013, we saw the stability of European financial markets facing significant challenges, with the crisis experienced by the overbanked Cypriot financial sector contributing the most to an increased default risk. The uncertainty as to the development of the financial crisis has spread to other countries, mainly in southern Europe, causing investors to demand higher returns on government bonds. On the back of speculation that our country's economic crisis is deepening further, the global rating agencies downgraded their sovereign ratings for Slovenia which, in turn, led to an increase in the cost of our country's sovereign debt.

Slovenia's economic development at the beginning of the year was more positive than it was at the end of last year, mainly due to a pick-up in economic activity registered by export-oriented industries that have managed quite successfully to penetrate the Eurozone markets that have seen a growth in demand. Exports remain the driving force of Slovenia's economic growth. In spite of an improvement in its economic picture at the beginning of the year, the short-term prospects for Slovenia continue to be unfavourable and uncertain. The registered unemployment rate is over 13%, with the year-on-year decrease in the number of employed persons reaching almost 3%. The number of bankruptcy proceedings started in the first quarter of 2013 was 149, almost the same number as in the same period last year (158).

The continuation of adverse conditions in the international marketplace, combined with a weak local demand, does not indicate a significant improvement in economic performance this year. As for

the banking sector, steps are being taken to implement the Measures of the Republic of Slovenia to Strengthen the Stability of Banks Act, as part of which the government has accelerated the process of completing the setting up of the Bank Assets Management Company and classifying certain categories of bank assets that are intended to be transferred to this company.

The results of the Nova KBM Group for the three-month period ended 31 March were affected by an increased number of bankruptcy proceedings and, consequently, a deterioration in its loan portfolio. Reversing this negative trend is the primary objective of the Management Board and all Nova KBM Group employees for 2013. In the first quarter of the year, we drew up the Nova KBM Group's restructuring plan and sent it for review and approval to the European Commission. This plan, once approved, will serve as one of the main pillars to support the implementation of necessary changes within the Bank and the formulation of a new overall strategy for the Nova KBM Group. By raising additional capital, restructuring the Nova KBM Group, and setting up a new strategy, we plan to strengthen the financial position and performance of both the Bank and the Nova KBM Group. While a considerable amount of work will be required to achieve our ultimate performance objectives, the results may not be obvious for several years given the nature of the changes necessary.

According to several international institutions, a decline in economic activity may be expected in Slovenia in 2013. The key factors that will drive the economic development in Slovenia this year are as follows: the continuation of public finance consolidation; the adoption of essential structural reforms; and the privatisation of state-owned enterprises. We will adapt the operations of both the Bank and the Nova

KBM Group to the current market conditions while focusing on making improvements in cost efficiency, on compliance with regulatory requirements, and on integration of operations within the Nova KBM Group. All the activities will be carried out in line with the Nova KBM Group's restructuring programme, prepared for the European Commission. Due to the harsh market conditions, further provisioning needs, and the negative macroeconomic outlook, the management forecast that both the Bank and the Nova KBM Group will end the year 2013 with a loss from continuing operations, although

this is expected to be lower than that of 2012.

Only through the implementation of a comprehensive restructuring programme will Nova KBM be able to strengthen its reputation, competitive position and profitability in the domestic and foreign markets, and re-embark on the path towards a sustainable business model. The demanding circumstances open for us opportunities for changes and innovations that will help the Nova KBM Group deliver stable and strong results in the future. We would like to thank all of you who trust in us and support our efforts.

Operating results of the Nova KBM Group

For the three-month period ended 31 March 2013, the **Group posted a pre-tax, pre-provision profit from continuing operations** of €8,649,000, which accounted for 42.0% of the figure reported for the same period last year. The **Group's pre-tax loss from continuing operations** amounted to €11,333,000, compared to a profit of €1,593,000 reported a year earlier. The year-on-year deterioration in the performance of the Group was attributable mainly to a 32.2%, or €10.6 million, decrease in net interest income. Interest expenses saw a year-on-year decrease of €2.2 million, while interest income dropped by €12.9 million compared to the same period last year.

The **Group's net loss** totalled €8,468,000, of which €6,858,000 was attributable to owners of the parent and €1,610,000 was attributable to the non-controlling interest. The net loss of the Group was €3,875,000 higher than the net loss posted by the Bank, partially as a result of net losses incurred by subsidiary companies (a total loss of €2.0 million), and partially due to the impact of consolidation entries (which related mainly to the auditing adjustments and additional impairment losses set aside by Adria Bank).

The banking division saw the largest decline in **net interest income**, with the net interest income of Nova KBM decreasing year-on-year by €5.9 million, or 26.2%, the net interest income of Credy banka decreasing by €1.6 million, or 61.7%, the net interest income of PBS decreasing by €1.4 million, or 22.2%, and the net interest income of Adria Bank decreasing by €0.9 million, or 39.4%. In the leasing segment, KBM Leasing registered a year-on-year decrease of €0.6 million in net interest income, while in the real estate segment, a decrease of €0.2 million in net interest income was reported by KBM Invest. The year-on-year drop in interest income earned by Nova KBM was the result of a decrease in interest income earned on loans (both loans to households and loans to non-financial companies), a decrease in gross loans given to the non-banking segment, an increase in impairment of interest income, a change in the structure of interest-bearing assets (shifting away from assets with higher returns to assets with lower returns), and a reduction in the average 6M EURIBOR.

Net fees and commissions generated by the Group in the first three months of 2013 totalled €14,179,000, a decrease of €720,000, or 4.8%, from the same period last year, mainly as a result of lower fees earned on loans. Nova KBM saw the largest drop in net fees and commissions (by €0.9 million, or 8.5%), followed by Adria Bank (by €0.1 million, or 33.6%). Net fee and commission income reported by KBM Infond increased year-on-year by €0.3 million, or 27.2%.

Other non-interest income of the Group decreased year-on-year by €1,792,000, partially as a result of losses incurred by Nova KBM on forward transactions, and partially due to the banking division's monthly accounting of the balance sheet tax. The drop in other non-interest income was in part offset by gains of €1.3 million realised by the leasing division.

Administration costs, including depreciation and amortisation, reached €28,307,000, down 0.8% from the same period last year, and 3.2% less than projected for the first quarter of 2013. Staff costs, which accounted for just over one-half of the total operating costs, were €14,307,000, a decrease of 5.7% from the same period last year. The ratio of operating costs to the average total assets stood at 2.13%, the same as at the end of 2012, while the cost-to-income ratio deteriorated to €76.60% as a result of a year-on-year decrease in income earned by the Group.

Net provisions and impairment losses recorded by the Group in the first three months of 2013 totalled €19,982,000, up 5.2% on the same period last year. The deterioration in the quality of the Group's loan portfolio continued throughout the first quarter of the year, but with less intensity than during the previous quarters.

As a result of the loss reported for the first three months of the year, the **Group's return on average assets before tax** (ROAA) was negative and stood at minus 0.86% (2012: minus 3.85%). The **Group's return on average equity before tax** (ROAE) was minus 17.14% (2012: minus 55.0%).

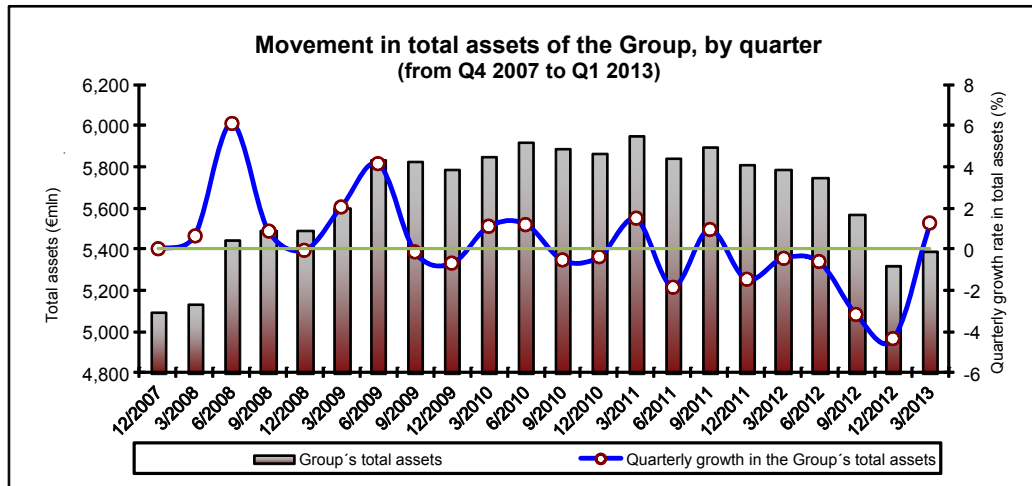

The **margin of financial intermediation**, calculated on the average total assets, stood at 2.83%, a decrease of 0.09 percentage points from 2012, due to extraordinary gains generated by the Group in 2012 on the sale of Zavarovalnica Maribor. The **interest margin**, also calculated on the average total assets, was 1.71%, down 0.16 percentage points from 2012.

For the three-month period ended 31 March 2013, the Group reported a **total comprehensive loss after tax** of €16,478,000, of which €8,468,000 was attributable to the net loss reported for the period, while the remaining amount of €8,010,000 was attributable to components of other comprehensive income. Valuation losses totalled €10,125,000, and the income tax in respect of components of other comprehensive income was €1,699,000.

Financial position of the Nova KBM Group

As of 31 March 2013, the Group's **total assets** amounted to €5,387.8 million, an increase of €66.0 million from the 2012 year-end.

Loans and deposits from the non-banking sector totalled €3,612.0 million at the end of March 2013, roughly the same figure as at the end of 2012. The decrease in loans and deposits registered by Nova KBM (mainly as a result of the conversion of a state loan into subordinated instruments, in accordance with the Hybrid Loan Facility Agreement) was offset by an increase in customer deposits registered by PBS and Adria Bank.

Net loans and advances given to customers decreased in the first three months of 2013 by €76.2 million, or 2.2%, to reach €3,321.7 million at the end of March 2013. Nova KBM saw the largest decline in net loans, which was partially due to a decrease in the volume of gross loans, and partially a result of additional impairment losses set aside by the Bank.

The balance of Nova KBM's **subordinated liabilities** increased following the conversion of a state loan into subordinated instruments, in accordance with the Hybrid Loan Facility Agreement.

Available-for-sale and held-to-maturity financial assets increased by €65.3 million from the end of 2012.

The Group's **total equity** decreased in the first three months of 2013 by 16.5 million, partially as a result of the net loss reported for the period, and partially due to the negative revaluation of securities through equity.

As of 31 March 2013, the Group's **Tier I capital ratio** and **Core Tier I capital ratio** stood at 8.13% and 5.16%, respectively.

Plans for the rest of 2013

The planning of the business policy and financial plan of the Group for the year 2013 was carried out on the basis of macroeconomic projections that were supported mainly by the autumn forecasts of the Institute of Macroeconomic Analysis and Development, and the Bank of Slovenia, taking into consideration the adopted strategy of the Group. The Bank's Supervisory Board consented to the 2013 plan of the Bank and the Group at its 19th regular meeting in December 2012. In spring 2013, a number of institutions involved in forecasting macroeconomic movements revised downwards their economic growth predictions for Slovenia for this year.

The **total assets** of the Group are projected to reach approximately €5,345.7 million by the end of 2013, up 0.4% on 2012. **Net interest income** is projected to be approximately €113.7 million, an increase of 7.4% relative to 2012. The **interest margin**, calculated as the ratio between net interest income and the average total assets, is projected to be 2.11%. **Net fee and commission income** is projected to amount to approximately €58.3 million, down 0.9% on 2012. **Administration costs, including depreciation and amortisation**, are projected to be €116.9 million, a decrease of 3.0% relative to 2012. Due to forecasts of a continuing economic crisis and a GDP decline in Slovenia and several other countries in the region, **provisions and impairment losses** will remain at relatively high levels, but are projected to be 44.7% below the figure reported for 2012. Considering this, the Group plans to report a **loss from continuing operations** also in 2013.

The management forecasts that the **total assets** of the Bank will reach €4,347.5 million by the end of 2013, an increase of 0.2% relative to the 2012 year-end. **Net interest income** is projected to be approximately €78.1 million, an increase of 8.9% relative to 2012. The **interest margin**, calculated as the ratio between net interest income and the average total assets, is projected to be 1.78%. **Net fee and commission income** is projected to amount to approximately €40.9 million, down 2.1% on 2012. **Administration costs, including depreciation and amortisation**, are projected to be €77.7 million, a decrease of 5.4% relative to 2012. The number of staff is projected to fall following the anticipated reorganisation and optimization of operating processes. Due to forecasts of a continuing economic crisis and a GDP decline in Slovenia, **provisions and impairment losses** will remain at an elevated level, but are projected to be about 50% below the figure reported for 2012. The Bank expects to end the year 2013 with a **loss from continuing operations**.
